

Google AI Residency Program

Google AI Residency Program

The Google AI Residency is a 12-month research training role designed to jumpstart your career in machine learning research. Residents will have the opportunity to work alongside distinguished scientists and engineers across various machine learning research teams within Google, such as **Google Perception, Natural Language Understanding, Google AI New York, and Google Brain team**. Residents will also have the opportunity collaborate with other Google and Alphabet teams such as **X, Google Cloud AI and Accelerated Sciences**. Check out g.co/airesidency for more information about our program, current resident profiles and examples of resident work.

Who should apply?

The ideal candidate should have a degree or equivalent practical experience in a STEM field such as Computer Science, Mathematics, or Statistics. Candidates should also present evidence of proficiency in programming (e.g. Python, C++) and in the prerequisite courses.

Most importantly, we are looking for people who are **motivated and want to learn to conduct machine learning research**. You may have research experience in another field (e.g. mathematics, physics, bioinformatics, etc.) and want to apply machine learning to this area, or you may have limited research experience but a strong desire to do more.

I'm interested! Can I apply now?

Applications for the 2019 AI Residency program will **open in Fall 2018**. Leave your details at g.co/airesidencysignup if you'd like to be notified when applications reopen!
